

## DISARONNO INGREDIENTS AT SIGEP 2024

The start of the year promises to be full of flavor and innovations for **Disaronno Ingredients**, which confirms its participation in the 45th edition of **Sigep – The Sweet World Expo** for the year 2024. Sigep is the reference event for the ice cream and bakery sector and will take place in **Rimini from January 20th to 24th, 2024**.

Sigep represents a truly unique opportunity to showcase the excellence that has always characterized the

company's philosophy. With a constant commitment to research and innovation, **Disaronno Ingredients** is ready to present the latest developments and unveil new flavors for the upcoming season. The stand, covering approximately a thousand square meters, is located in the dedicated ice cream and pastry pavilion (**Hall 3 – booth 001-041-081**) and will be the ideal stage for the company to share the

**2024 innovations** with the national and international audience, as well as an opportunity to engage with its customers. Industry professionals will have the opportunity to explore the entire products portfolio, starting from **Anselmi 1892** with its excellences (such as the pure Bronte Green Pistachio DOP paste), moving on to **Prodotti Stella** and its exclusive **All Natural** line (the widest range of 100% natural products in the industry), and the versatile offerings of the **Montebianco** range.

This includes **Eurobisco** and **Chiaravalle**, high-quality bakery products for pastry and ice cream including ice cream cookies, cream puffs, and sponge cakes.

The **Selection** line will also be featured, which includes complementary accessories for ice cream service.

The 45th Sigep – The Sweet World Expo will not only be a professionally relevant international event, but also a celebration of flavors, attentive

to new market trends, aimed at ushering and unveiling the future of artisanal ice cream with **Disaronno Ingredients**.

The recently acquired brand **Alvena** will also be officially launched at Sigep, enriching the entire range of Disaronno Ingredients products with the introduction of various free-from solutions.
